

## THURSDAY, 29<sup>TH</sup> OCTOBER 2020

### «How to manage risks during a global pandemic»

No one really knows where the journey will lead. Especially in challenging situations, it is important to get reliable information. This year's Coface Country Risk Conferences in the web format provides you a platform to hear first-hand from proven experts about their findings and assessments. It is very important to us that you can get engaged. It will be possible for all participants to raise questions.

The invited experts will elaborate on the following questions in their presentations and in a panel discussion:

- Who is hit most by the Covid 19 shock?
- Who benefits from the «new normal»?
- Is this the end of the global value chain as we know it?
- How will the pandemics change our behaviour?
- Are there further pandemics on the way?
- How can we prepare for future global pandemics?

We are very pleased to be able to present an interesting and varied program to you and we are looking forward to an exciting event online.
